工矿灯

HIGH BAY LIGHT

通常均匀布置在工作场地的上方或侧壁上,照明整个工作面。
工矿灯的反射器应能产生各种宽窄程度的光分布,适合于大面积、工作面垂直或接近垂直的工作场所。LED工矿灯光效高,更加节能,显指高达 $RA \geq 80$,安全可靠。

适用场景:工厂、矿井、仓库、高棚等生产作业区。

Usually evenly arranged above the work site or on the side wall, lighting the entire work face. The reflector of the industrial and mining lamp should be able to produce light distribution of various widths and narrow degrees, which is suitable for large areas and vertical or nearly vertical working areas. LED mining lighting has high efficiency, more energy saving, indicating $RA \geq 80$, safe and reliable. Applicable scenarios: factories, mines, warehouses, high sheds and other production areas.
